

## Setting Up a QR Code

This is from the following website if you wish to see this interactively on your computer:

[http://www.socialquickstarter.com/content/95-setting\\_up\\_a\\_qr\\_code](http://www.socialquickstarter.com/content/95-setting_up_a_qr_code)

This is an extremely important tool we could be using right now for directing people to Firewise info, Ready Set Go, info updates, you name it----you can put your referral on your business card, on paper products, you could even put them on the back of cash register receipts, mugs, keychains, the sky is the limit and direct people to any informative product you want them to see, websites, photos, etc

### Step 1

Pick a code generator website. Most QR Code generators are free to use and fast to set up.

Here are three popular free sites:

- <http://www.qrstuff.com/>
- <http://qrcode.kaywa.com/>
- <http://goqr.me/>

We're going to walk you through the steps of setting up a QR Code on <http://goqr.me/>.

### Step 2

Decide what type of content you want to share.

You can set the code generator to show text, place a phone call, send a text message, or send your customers to a specific URL.

Don't forget: If you're sending people to a website or video, make sure it is viewable on mobile devices!

## Step 3

Preview your QR code on a mobile device. You'll want to check and make sure that your QR code works correctly.

## Step 4

Download your code. To download the file, **Click On the Download** button at the bottom of the screen and then save the image file on your computer for future use.

## Step 5
